## PROFESSIONAL EXPERIENCE

---

### Full Stack Developer — Absolute Web Pvt Ltd

Vadodara, India | Jun 2026 - Present

- Working in a 3-person full-stack team building Cambrean, a tax and client-onboarding platform for a US-based client, using Next.js and MySQL across both backend and frontend.
- Designed and implemented backend logic for a sales tax calculation engine covering 7+ distinct tax rules, including state tax and county tax evaluation and vendor compensation calculations.
- Worked across 40+ of 104 database tables, building and maintaining schema logic and queries supporting tax, onboarding, and client data structures.
- Built and maintained 12+ REST API endpoints supporting onboarding workflows for individual clients, business clients, and employees
- Improved API responsiveness by implementing pagination, sorting, and filtering on data-heavy endpoints, and improved frontend performance with lazy loading.
- Engineered a document upload system using physical disk storage, cutting document upload processing time by 60%.
- Contributed to key system design decisions and participated directly in client meetings with the US-based stakeholder.

### Full Stack Developer Trainee — QuantumIT Innovation

Remote, India | Nov 2025 – Apr 2026

- Designed and developed the complete scalable backend architecture for Admin, Guard, and User roles using Node.js, Express.js, PostgreSQL, and JWT-based authentication.
- Built and optimized REST APIs and enforced secure role-based access control (RBAC), reducing API response time by 30% through query optimization and efficient data modeling.
- Owned the Admin Panel frontend using Next.js and React.js, improving page load performance by 25–35% and cutting initial load time by ~1.2s via lazy loading and code splitting.
- Implemented and fine-tuned cron jobs for automated scheduling, reducing API response time by 40% and improving system reliability.
- Used Postman to test and validate 25+ API endpoints; refactored the codebase to reduce production bugs by ~20%.
