PROFESSIONAL EXPERIENCE

Full Stack Developer Trainee

Nov 2025 – Apr 2026

QuantumIT Innovation

Remote, India

- Designed and developed the complete scalable backend architecture for Admin, Guard, and User roles using Node.js, Express.js, PostgreSQL, and JWT-based authentication.
- Built and optimized REST APIs, managed relational data with PostgreSQL/pgAdmin 4, and enforced secure role-based access control (RBAC) reducing API response time by 30% through query optimization and efficient data modeling.
- Owned the Admin Panel frontend using Next.js and React.js, improving page load performance by 25–35% through lazy loading, code splitting, and API optimization.
- Implemented and fine-tuned cron jobs for automated scheduling and background tasks — optimized port release cycles and resource cleanup, reducing API response time by 40% and improving overall system reliability.
- Deployed and maintained services on AWS and Render; managed environment configurations and production stability.
- Used Postman for API testing, debugging, and validation across 25+ API endpoints; refactored codebase to boost performance, scalability, and maintainability in production.

KEY PROJECTS

DevFlow Web/App – Community-driven Q&A platform for developers built with Next.js 15, ShadCN, Clerk, MongoDB & Google Gemini AI for intelligent answers with secure authentication. [\[GitHub\]](#) [\[Live\]](#)
