SUMMARY

Full Stack Developer with experience in Python, JavaScript, TypeScript, React, Next.js. Skilled in building dynamic websites, scalable architectures, RESTful APIs, and Static Site Generation. Proficient enhancing frontends with Redux. Committed to writing clean, well-documented, and tested code while collaborating effectively on software solutions.

TECHNICAL SKILLS

Programming Languages: SQL, Python, Java, JavaScript, TypeScript, C, C++, HTML, TailWind CSS

Web Stack: NodeJS, ReactJS, React DOM ExpressJS, NextJS 14 & 15, RESTful API

Dev Tools: Shadcn, Clerk, Postman, Vercel, Render, Redux Toolkit, Jest, JWT, OAuth, Bcrypt

Database: MySQL, Postgres, MongoDB, Cloudinary

Dev and ML Tools: GitHub, VS Code, CI/CD, Linux, NPM, Yarn

Soft Skills: Problem-Solving, Decision making, Leadership, Communication, Collaboration, Agile & Scrum

EXPERIENCE

Software Development Intern

V-Ex Tech Solution, Vadodara

Jan 2025 – Mar 2025

- Developed and maintained web applications using the **MERN** stack (MongoDB, Express.js, React.js, Node.js) and Next.js for optimized performance.
- Collaborated with senior developers to implement new features and optimize application performance.
- Transformed **designs and wireframes** from Figma into a seamlessly responsive user interface in React.
- Built dynamic web applications using **React**, JavaScript, HTML, and CSS.
- Designed and integrated **RESTful APIs** to enhance data communication between frontend and backend.
- Utilized **Redux** for state management and improved application scalability.
- Gained hands-on experience with **CI/CD** pipelines, Next.js server-side rendering, and version control using **GitHub**.
- Assisted in troubleshooting, **bug fixing**, and enhancing overall system efficiency.

EDUCATION

Drs. Kiran and Pallavi Patel Global University

Bachelor of Technology (CGPA – 8.78 / 10)

Vadodara, India

Oct 2021 – May 2025

Ambe Vidyalaya

Higher Secondary School (Score – 81%)

Vadodara, India

Jun 2019 – May 2021

PROJECTS

DevFlow Web/App - A platform for quering programming questions

[Website/GitHub Link](#)

A full stack website/ community-driven platform for asking and answering programming questions built using Nextjs 15, Shadcn, Clerk and MongoDB database with integrated AI(chatgpt) and many other tools, managed single handedly.

EduSpark Web/App - An online student learning platform

[Website/GitHub Link](#)

A full stack website/learning platform for students to learn/strengthen their skills they desired to, built using MERN stack and MongoDB database, with Razorpay gateway for payment features a user-friendly interface, real-time progress tracking, and interactive courses to enhance the learning experience, handled single handedly.

E-commerce Web (Front-end)

[GitHub Link](#)

Built an E-commerce static website interactive front-end with the help of Reactjs , Tailwind Css and JavaScript concepts, Implemented responsive design and dynamic UI components for an engaging user experience.
